Embra®

Caring for the future

Embra®, derived from the word “embrace” stands for a clear commitment to embrace both environmental and social sustainability. Embra® works consistently and continuously to give the world healthcare solutions that focus on lowering environmental impact, while delivering quality and performance for patients and caregivers.

Our mission is to develop responsible healthcare solutions focused on lowering the environmental impact while heightening quality for patients and caregivers. We always consider utilizing innovative processes and raw materials that enable us to reach our goals. We also hold each and every Embra® product to strong ethical codes, and to quality reviews throughout its entire value chain.

This is the Embra® way. It's our way of caring for patients, caregivers and the future

evercare®

Solutions for premium care

The evercare® brand is composed of a premium product range that delivers a comprehensive assortment of examination gloves, surgical gowns and drapes, and wound care, infusion and injection solutions. Offering premium value, more features, and high quality across the product portfolio, evercare® is driven by continuous development and innovation to treat patients with the best possible clinical solutions.

SELEFA®

Affordable solutions for care

The SELEFA® brand provides value for money through its wide range of affordable products, including examination gloves, paper and plastic consumables, non-woven products, bandages and gauze.

Development under the brands Embra®, evercare® and SELEFA® follows a quality management system with established working methods and processes according to the Medical Device Regulation (MDR).

We are powered by a commitment to meeting customer needs, undertaking extensive quality control, and investing in efforts to reduce our impact on the environment, all in the name of improved patient outcomes.

evercare[®] inLine 3-way stopcock & 3-way stopcock with extension line

evercare[®] inLine 3-way stopcock, PVC-free

REF: 10554-01

evercare[®] inLine 3-way stopcocks are a and broad range of product for different needs. 3-way stopcock with extension tubing in different legths enabling connections to two sources of infusion and/or injection or a combination of both. Stopcock are sterile, single use products that are used to conduct intravenous fluids as an extension of the infusion or perfusion device, by enabling connections to two sources of infusion and an infusion device with vascular access.

Key Features

- ▶ Lipid resistant
- ▶ 45° click feature
- ▶ Products can withstand upto 4,5 bar liquid pressure
- ▶ Without tubing

REF	DESCRIPTION	SIZE - Tube Ø Inner/outer, L(length)	PRIMING VOLUME (ml/cm)Approx	PACK COUNT dispenser /carton
10554-01	3-way stopcock, PVC-free	Ø / mm, NA	0,250	50 / 200

Sales Unit: Transport Carton

evercare[®] inLine 3-way stopcock, Needle free connector, PVC-free

evercare® inLine Gravity set Vented

evercare® inLine Gravity set, Vented, PVC-free

REF: 10500-01, 10502-01

evercare® inLine Gravity Sets are sterile, single use products that are used to conduct intravenous fluids into the vascular system of a patient by connecting to a source of infusion in one end and to an infusion device with vascular access in the other end. The fluid is transferred by the means of gravity and the flow rate is regulated by a roller clamp component. Suitable for glass bottles, glass vials and plastic bags or bottles .

Key Features

- ▶ Transparent soft drip chamber for easy squeezing and filling
- ▶ 15-micron particle filter at bottom of the drip chamber
- ▶ Hydrophobic filter prevents leakage while priming
- ▶ Rotating luer lock

REF	DESCRIPTION	SIZE - Tube Ø Inner/outer, L(length)	PRIMING VOLUME (ml/cm)Approx	PACK COUNT dispenser /carton

Sales Unit: Transport Carton

evercare® inLine Gravity set, Non-Vented, Needle free connector, PVC-free

REF: 10513-02

evercare® inLine Gravity Sets are sterile, single use products that are used to conduct intravenous fluids into the vascular system of a patient by connecting to a source of infusion in one end and to an infusion device with vascular access in the other end. The fluid is transferred by the means of gravity and the flow rate is regulated by a roller clamp component. The non-Vented Gravity Sets are suitable for infusion with plastic bags or bottles and no need for venting and to avoid risk of air infusion.

Key Features

- ▶ Transparent Soft drip chamber for easy squeezing and filling
- ▶ 15-µm particle filter at bottom of the drip chamber
- ▶ Hydrophobic filter prevents leakage while priming
- ▶ Y-Needle Free Connector
- ▶ MicroClave Clear
- ▶ Can be activated up to 700 times
- ▶ Proximal end of the tubing
- ▶ Rotating luer lock

evercare® inLine Monoset, Duoset

evercare® inLine Monoset, 1-way, PVC-free

REF: 10515-01

evercare® inLine Monoset is a safe system for mixing of drugs and preparation of medication. By using the system the users minimize the spillage and aerosols from hazardous drugs. Monosets are sterile, single use products that are used to conduct intravenous fluids into the vascular system of a patient by connecting to a source of infusion in one end and to an infusion device with vascular access in the other end. The fluid is transferred by the means of gravity and the flow rate is regulated by a blue roller clamp component.

Key Features

- ▶ Transparent Soft drip chamber for easy squeezing and filling
- ▶ 15-micron particle filter at bottom of the drip chamber
- ▶ Hydrophobic filter prevents leakage while priming
- ▶ Side Tubing
- ▶ 15 cm long tubing with side spike.
- ▶ C-Clamp to stop the flow of fluid within the tubing.
- ▶ Rotating luer lock

The fluid is transferred by the means of gravity and the flow rate is regulated by a Red roller clamp component.

Key Features

- ▶ Transparent Soft drip chamber for easy squeezing and Filling
- ▶ Hydrophobic filter prevents leakage while priming
- ▶ Fixed luer-lock

REF	DESCRIPTION	SIZE - Tube Ø Inner/outer, L(length)	PRIMING VOLUME (ml/cm)Approx	PACK COUNT dispenser /carton
10682	Transfusion set, Non-Vented, PVC-free	Ø 3/4.1 mm, L 180cm	0,065	20 / 80

Sales Unit: Transport Carton

evercare[®] inLine Transfusion set, Non-Vented, Y-type, PVC-free

REF: 10680

evercare[®] inLine Transfusion sets without air vent function suitable for a bag with blood or blood components . Drip chamber with integrated large fluid filter surface area along with porosity of 200 µm to secure a high flow rate. Transfusion sets are sterile, single use products that are used to conduct intravenous fluids into the vascular system of a patient by connecting to a source of infusion in one end and to an infusion device with vascular access in the other end. The fluid is transferred by the means of gravity and the flow rate is regulated by a Red roller clamp component.

Key Features

- ▶ Transparent Soft drip chamber for easy squeezing and filling
- ▶ Hydrophobic filter prevents leakage while priming
- ▶ C-Clamp to stop the flow
- ▶ Rotating luer lock

REF	DESCRIPTION	SIZE - Tube Ø Inner/outer, L(length)	PRIMING VOLUME (ml/cm)Approx	PACK COUNT dispenser /carton
10680	Transfusion set, Non-Vented, Y-type, PVC-free	Ø 3/4.1 mm, L 180cm	0,065	15 / 60

Sales Unit: Transport Carton

evercare[®] inLine Transfusion set, Non-Vented, 3-way stopcock, PVC-free

REF: 10684

evercare[®] inLine Transfusion sets without air vent function suitable for a bag with blood or blood components . Drip chamber with integrated large fluid filter surface area along with porosity of 200 µm to secure a high flow rate. Transfusion sets are sterile, single use products that are used to conduct intravenous fluids into the vascular system of a patient by connecting to a source of infusion in one end and to an infusion device with vascular access in the other end. The fluid is transferred by the means of gravity and the flow rate is regulated by a Red roller clamp component.

Key Features

- ▶ Transparent Soft drip chamber for easy squeezing and filling
- ▶ Hydrophobic filter prevents leakage while priming
- ▶ 3-way stopcock
- ▶ Lipid resistant
- ▶ 45° click feature
- ▶ Can withstand up to 2 bar
- ▶ Non-glued
- ▶ Rotating luer lock

REF	DESCRIPTION	SIZE - Tube Ø Inner/outer, L(length)	PRIMING VOLUME (ml/cm)Approx	PACK COUNT dispenser /carton
10684	TRANSFUSION SET, NON-VENTED, 3-WAY STOPCOCK, PVC Free	Ø 3/4.1 mm, L 195cm	0,065	20 / 80

Sales Unit: Transport Carton

evercare[®] inLine Urological set

evercare[®] inLine Urological set, Single, PVC-free

REF: 10556, 10665

evercare[®] inLine Urology sets are used to conduct fluids through gravity method, by enabling connection to a fluid container to carry out washing and/or cleaning of urethra or bladder through the irrigation tube connected to a final medical device directly in contact with patient body. PVC-free Urology sets can be used for irrigation and for cystoscopy, T.U.R and other arthroscopic surgical procedures. Y-type make it possibility to have a continuous flow and use the same set for continuous irrigation according to internal procedure or guidelines.

Key Features

- ▶ Large bore set with long tubing
- ▶ C-Clamp to stop the flow of the infusion
- ▶ Transparent, Soft & larg drip chamber
- ▶ For easy squeezing and filling
- ▶ For safe high flow rate
- ▶ To minimize the risk of air pockets within the tubing
- ▶ White Roller clamp
- ▶ Three different connectors for all kind of applications
- ▶ 15 cm silicone tubing
- ▶ Standard cone
- ▶ Luer lock adaptor (bi-packed)
- ▶ A secondary sterile packaging with a primary protective packaging inside & can be used to open within a sterile field
- ▶ Single -connection with 1 spike
- ▶ 1-way
- ▶ 1 C-clamp

REF	DESCRIPTION	SIZE - Tube Ø Inner/outer, L(length)	PRIMING VOLUME (ml/cm)Approx	PACK COUNT dispenser /carton
10556	Urological set, Single, PVC-free	Ø 4.8/6.8 mm, L 215cm	NA	5 / 25
10665	Urological set, Single, PVC-free	Ø 4.8/6.8 mm, L 285cm	NA	5 / 20

Sales Unit: Transport Carton

evercare[®] inLine Urological set, Y-type, PVC-free

REF: 10555

evercare[®] inLine Urology sets are used to conduct fluids through gravity method, by enabling connection to a fluid container to carry out washing and/or cleaning of urethra or bladder through the irrigation tube connected to a final medical device directly in contact with patient body.
